PROFESSIONAL SUMMARY

I am a Full Stack Developer with over 15 years of experience building web applications. I work from technical analysis to production with Angular, React, TypeScript, Node.js and NestJS, including REST APIs, integrations and testing. I contribute to architecture, performance, security and CI/CD, share best practices and use AI to support development.

TECHNICAL SKILLS

Frontend Angular · React · TypeScript · JavaScript · Microfrontends · Design Systems · HTML5 · CSS3/SASS

Backend Node.js · NestJS · REST APIs · Backend for Frontend (BFF) · SQL/NoSQL

Quality Jest · Cypress · Testing Library · Unit, Integration and E2E Tests

DevOps CI/CD · GitHub Actions · Docker · Git

Engineering AI-first Development · Software Architecture · Code Review · Performance · Security

PROFESSIONAL EXPERIENCE

Staff Software Engineer · HSystem Jan 2024 – Present

- I develop web applications, APIs and Backend for Frontend (BFF) solutions from analysis to production with Angular, TypeScript, Node.js and NestJS.
- I contribute to integrations, databases, testing, performance, security and CI/CD, and participate in architecture discussions.
- I use AI tools and agents to support implementation, refactoring, testing, documentation, code analysis and automation.
- I review code and share best practices with the team.

Frontend Engineer · Banco BV Apr 2022 – Jan 2024

- I developed mission-critical Angular applications in a large-scale banking environment, with strong unit and end-to-end testing practices.
- I contributed to the internal Design System, improving consistency and delivery speed across squads.
- I integrated REST APIs and BFF layers to support the bank's digital products, also using React and Node.js on specific initiatives.
- I mentored less experienced developers, supporting the team's technical growth and the delivery of a highly scalable project.

Principal Frontend Engineer · Mottu Oct 2021 – Apr 2022

- I architected and implemented Angular microfrontends with Module Federation, enabling independent squads to evolve in parallel.
- I developed delivery, back-office and self-service kiosk applications, focusing on performance and testing.
- I restructured legacy projects into a scalable frontend architecture and defined technical standards adopted by the engineering team.
- I created interfaces independently when needed, applying UI/UX knowledge.

Frontend Engineer · Cielo Oct 2019 – Oct 2021

- I built digital payment solutions used by millions, including dashboards and financial transaction monitoring systems.
- I developed reports and tools to identify transaction service instability using Angular, React, Node.js, Sass and Bootstrap.
- I worked in agile Scrum squads focused on quality, prioritizing production performance and stability.
- I implemented automated tests, increasing the team's code coverage.

Web Developer Full Stack · Fast Solutions Jan 2017 – Oct 2019

- I developed web systems for large corporations, focusing on code quality, performance, security and user experience.
- I worked on frontend (HTML5, CSS3, Sass, JavaScript/ES6+, jQuery, VueJS, Angular, Webpack) and backend (.NET, ASP.NET Core, C#, SQL Server, Dapper, Entity Framework Core).
- I applied MVC/MVVM, REST, Web API, SPA and JWT patterns in component-based projects, using GitHub and TFS for version control.

Web Developer · Inter.net Brasil Jan 2016 – Jul 2016

- I worked as an intern on frontend and backend development of websites for the company's clients.

Web Developer · Soyuz Jul 2015 – Jan 2016

- I worked as a frontend-focused intern, developing websites for the company's clients.

Frontend Developer · Deevo Studio Jan 2015 – Dec 2016

- I developed corporate websites and WordPress CMS systems with HTML5, CSS, JavaScript/jQuery, PHP and MySQL.
- I worked on parallel agency projects, delivering responsive and interactive web interfaces.

Web Developer · TIM Brasil Mar 2013 – Jun 2015

- I was hired as a full-time apprentice; I developed and continuously supported web systems essential to the call center team.
- I built tools to analyze and manage customers' internet usage using PHP, MySQL, HTML, CSS, JavaScript and Git.

Technical Support Assistant · Universo Tintas Nov 2009 – Nov 2011

- I started in an internal office support role and moved to IT, where observing system development led to my first encounter with programming.
- This experience opened the door to my career in web development.

EDUCATION

Bachelor's Degree in Computer Science — Descomplica Faculdade Digital 2024 – 2028 (in progress)

Technology Degree in Internet Systems — Centro Universitário Senac (Brazil) 2013 – 2016
